

BEACON 2 SETUP GUIDE

FOR FIBRE INTERNET

For general support for your Internet,
or for additional self-help resources
visit ebox.ca/FAQ or contact our Technical
Support team at **1-844-323-EBOX (3269)**

CONNECTING WIRED DEVICES

Each router is equipped with one ethernet port.
This port can be used to connect nearby devices,
such as a TV set top box or gaming console.

If you're subscribed to EBOX Home Phone,
please connect the Home Phone adapter to
the yellow port.

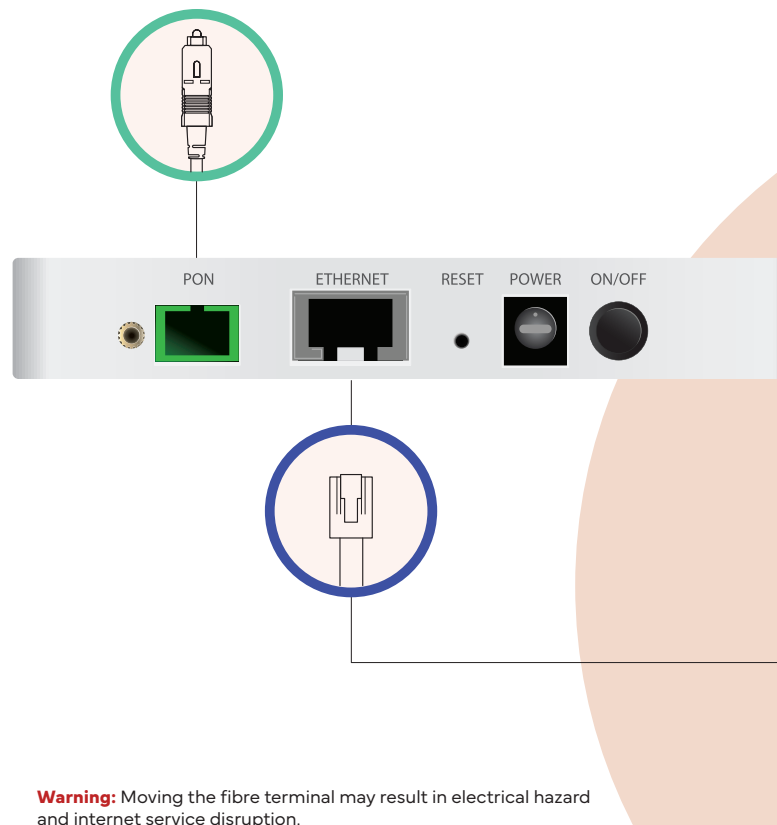

**SETTING UP YOUR FIBRE INTERNET
SERVICE AND WI-FI NETWORK**

1 FIBRE INSTALLATION

A technician will complete your fibre installation inside your home.

This will take approximately 2-4 hours. The technician will test the fibre terminal/ONT, and leave it connected to the fibre Internet cable and powered on.

2 CONNECT AND POWER DEVICES

Connect the ETHERNET cable from the fibre terminal to the blue WAN port on the router.

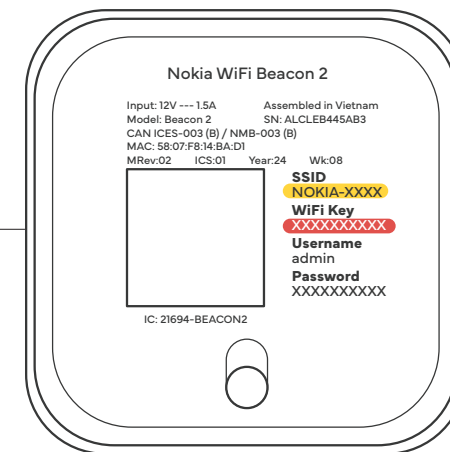

The light on the bottom of the router should proceed from white to blue, back to white and then remain steady on blue when configured. This can take about 15 minutes.

3 CONNECT TO WI-FI

Go to Wi-Fi settings on a device you would like to connect, and search for available Wi-Fi networks.

Select the **WiFi Name (SSID)** and enter the **password (WiFi Key)** that matches those found on the bottom of your router. The password is case sensitive.

DOWNLOAD THE NOKIA WI-FI MOBILE APP TO MANAGE YOUR INTERNET

- Customize your Wi-Fi Name and Password
- Create a separate network for guests
- Parental controls

**THAT'S IT,
YOU SHOULD NOW BE READY TO ENJOY
YOUR EBOX WI-FI!**
