CONNECTING WIRED DEVICES

Each router is equipped with two ethernet ports. These ports can be used to connect nearby devices, such as a TV set to box or gaming console.
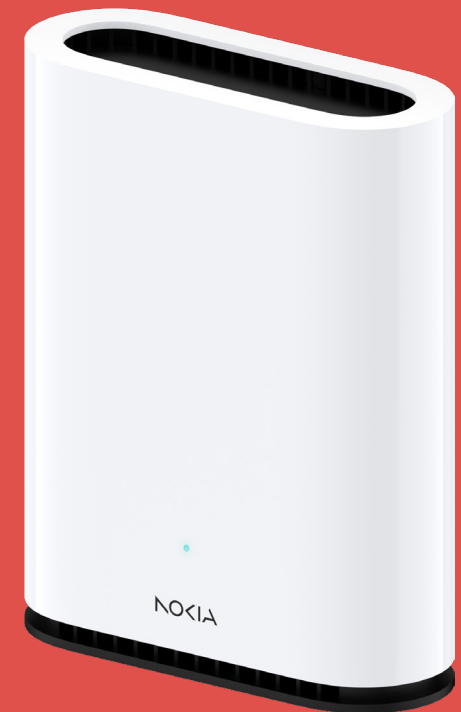

If you're subscribed to EBOX Home Phone, please connect the Home Phone adapter to the first yellow port.

1 FIBRE INSTALLATION

A technician will complete your fibre installation inside your home.

This will take approximately 2-4 hours. The technician will test the fibre terminal/ONT, and leave it connected to the fibre Internet cable and powered on.

PON   ETHERNET   RESET   POWER   ON/OFF
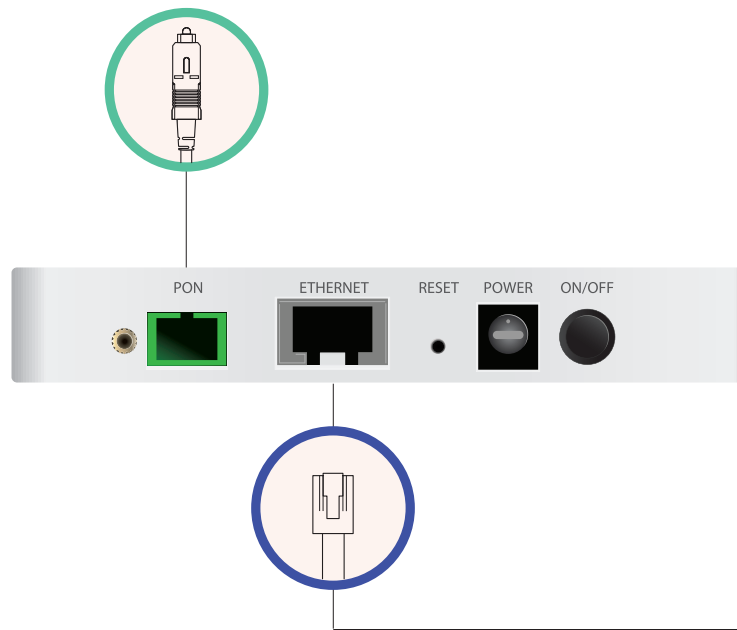

Warning: Moving the fibre terminal may result in electrical hazard and internet service disruption.

2 CONNECT AND POWER DEVICES

Connect the ETHERNET cable from the fibre terminal to the blue WAN port on the router.

The light on the bottom of the router should proceed from white to blue, back to white and then remain steady on blue when configured. This can take about 15 minutes.

ON/OFF POWER USB WAN/LAN LAN 1 LAN 2 WPS
